

# How To Upgrade Windows 11

## Prerequisites

Navigate to this [link](#), and install the files there.

After, save them to a **USB DRIVE**.

## How To

1. On the PC you want to update, plug in the USB drive
2. COPY the flyby11\_classic and the Windows 11\_24\_H2\_English\_x64.iso from the usb drive to the desktop
3. Open the flyby11\_classic folder, and RUN flyby11 **APPLICATION**
4. Press "Start Upgrade Now"
5. Drag the .iso file into the window, and let it mount
6. Ignore "Install Windows Server" and press **Next**
7. Keep files, settings, and apps
8. "Making sure ready to install" **Just wait**
9. Then screen will turn blue and update will begin.
  1. **This will take up to 2 hours!!!!**
10. **Verify the PC can be accessed on Mesh.**
11. Done.
